

## Mr. Ensrude's 5th Grade

September 16, 2022

### REMINDERS:

- Book Projects are due on Friday, September 23. Students could have time in class to work on their project during the week, so please be sure your child is bringing their project to school.
- Chromebook Agreement Forms came home today. Please go over these with your child and return to Mr. Ensrude as soon as possible.
- Mid-Quarter reports will be emailed out today.

### Math

Next week we will start on Unit 2 in our book. Within this unit we will be working with place value, decimal numbers, percents, and rounding.

### Science

In science we continued to discuss properties of matter. Next week we will be doing an experiment where we will attempt to remove the iron from breakfast cereal.

### Geography

The students had their test on Friday finishing off our first chapter on Brazil. The kids have done a great job taking notes and preparing for the test. Be sure to ask your child what region we decided to start next week.

### ELA/Writing

In writing we continued to work on our perspective writing. We will be completing our rough drafts early next week and do some editing and revising before we type our final copy. We will also be looking at figurative language and using sensory details when writing.

### Reading

We finished up Number the Stars this week and had our comprehension test. The kids really enjoyed the book and some even admitted that when they first looked at it, they didn't think they would like it. It is always fun to see kids really getting into a book! We finished the week off by watching the movie version of the book. It was fun to hear the kids talking about all the things the movie version left out of the story.

### Vocabulary

We will be back to Flocabulary next week with Unit 3. We will get our packet on Monday and it will be due on Friday. Don't forget to have your child go over their words for the week and understand the meanings. We will have our quiz on Friday.

### Spanish

Students have a Spanish assignment due every Tuesday and Friday. Be sure your child is staying on top of their assignments. They are allowed to work ahead if they would like.
